- Small increase of nuclear power generation essentially due to China.
- Long-term decline of nuclear power's role continues.
- Cost differential between nuclear and renewables still increases.
- Nine of 31 nuclear countries generate more power with renewables than nuclear.
- Nuclear power capacity additions are insignificant in global market (1 GW/257 GW net in 2017). Nuclear power becomes irrelevant.
- Reactor construction starts down from 15 in 2010 to 5 in 2018; no commercial reactor building started in China since 2016.
- Nuclear power is a species on way of extinction. Renewal rate too small for survival.
- Decommissioning in early stages, only 10 of 174 closed sites at greenfield status.
- New-build—and increasingly existing nuclear—is more expensive (€/MWh) than solar/wind and is therefore contributing to climate change.
- Existing nuclear is a very powerful innovation barrier see Germany vs. Japan.

Mycle Schneider works as independent international consultant on energy and nuclear policy. He is the initiator and Convening Lead Author of the [World Nuclear Industry Status Reports](#). He is the Coordinator of the Seoul International Energy Advisory Council (SIEAC) and the Spokesperson for [IEAC](#). He is a member of the International Panel on Fissile Materials ([IPFM](#)), based at Princeton University, USA. In 2010-2011, he acted as Lead Consultant for the Asia Clean Energy Policy Exchange, implemented by [IRG](#), funded by [USAID](#), with the focus of developing a policy framework to boost energy efficiency and renewable energies. Between 2004 and 2009 he has been in charge of the Environment and Energy Strategies Lecture of the International Master of Science for Project Management for Environmental and Energy Engineering at the *Ecole des Mines* in Nantes, France.

From 2000 to 2010 he was an occasional advisor to the German Environment Ministry. 1998-2003 he was an advisor to the French Environment Minister's Office and to the Belgian Minister for Energy and Sustainable Development.

Mycle Schneider has given evidence or held briefings at national Parliaments in 15 countries and at the European Parliament. He has advised Members of the European Parliament from four different groups over the past 30+ years. He has given lectures or had teaching appointments at 20 universities and engineering schools in 10 countries.

Mycle Schneider has provided information and consulting services to a large variety of clients including international institutions and organizations, think tanks and NGOs.

In 1997, he was honoured with the [Right Livelihood Award](#) ("Alternative Nobel Prize").
